It has tons of features...LOL.I was also looking for a decent recording tool, so I'll keep an eye out for this. Keep up the good work guys. Dude, how about you find another microphone that works? The "Any audio interface works", crap, you might want to check out your priorities, and re-order them, first. First of all, I would like to apologize to the users of the audio tools for being insensitive, condescending and arrogant. Quote: Originally Posted by MisterSquint Do

Fangxun audio recorder is a lightweight application that helps you record the audio streams from different sources, and the built-in settings are more than enough to ensure the excellent audio quality. Fangxun audio recorder is an easy-to-use application built especially for helping you capture the audio streams from different sources. Fangxun audio recorder sports a clean and straightforward layout that allows you to set up the audio parameters with minimum effort. The program gives you the possibility to select the audio device, samples per second, sample channels, and sample bits. Fangxun audio recorder lets you start or stop the audio recording process and choose between three different recording options, namely manual or automatic mode, or scheduled tasks. What's more, you are allowed to adjust the volume, pick the saving directory, set up conditions for triggering the automatic recording mode, as well as specify the audio tag information (e.g. title, artist, composer, album, track, year). When it comes to exporting options, you can save the recorded audio streams to WAV, AIFF, SND, MP3, OGG, WMA, FLAC, APE, or AAC file format. Depending on the desired output format, the tool offers several sampling parameters. Other notable characteristics worth mentioning are represented by the possibility to automatically assign filenames to the recorded items, view details about the recorded file (e.g. filename, status, duration, file size, encoding mode, rate, VBR quality), and check the sound spectrum of the recording device in real time. Last but not least, you can analyze the log section for additional information about the entire recording process and possible errors, choose an external media player for listening to the recorded items, delete the selected files, as well as open the target location directly from the main window. During our testing we have noticed that Fangxun audio recorder carries out the recording operation very quickly, provides good audio quality, and no errors showed up throughout the entire process. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not affected. All things considered, Fangxun audio recorder offers a handy set of parameters for helping you record sound from different sources. Thanks to its intuitive layout, it is suitable for rookies and professionals alike.
