offline support SlovoEd Deluxe is a native Russian dictation translation application for Windows. It lets you write text in Russian and translate it to German. It has a feature that automatically searches for words in the dictionary in your language. SlovoEd Deluxe is a native Russian dictation translation application for Windows. It lets you write text in Russian and translate it to German. It has a feature that automatically searches for words in the dictionary in your language. Common shortcomings: • The text is not searched for both of the two languages • "Translate" button is absent If you're looking for a powerful dictation translator that supports Russian language, you might also be interested in another useful Russian dictation

software, DeepRussian, which is also native in that it supports Russian. Bulk Importing and Transcribing with SlovoEd If you want to cut the time needed to add words to SlovoEd and also learn to transcribe foreign text, then the following videos are for you. In the first video, Dmytro Burmistrova explains how to bulk import a bunch of text and later transcribe it. In the second video, Dmytro Burmistrova explains how to bulk import and transcribe text. Before you begin transcribing, you'll need to locate the word you're transcribing. You can use SlovoEd's built-in dictionary, or any dictionary you like to locate the word. To find the word you're looking for, click the Search feature on SlovoEd's main window. From the results, find the word you want to

transcribe. Then, right-click the word, and select Copy. To speed up the task, search for the word you're looking for first in the Dictionary panel. This method is particularly handy if you have thousands of words to look through. To import a whole bunch of text into SlovoEd, you'll need to

KeyMacro is a powerful script editing program designed to edit all Windows Script files (.vbs,.wsc,.nsh,.js,.bat etc) and code macros in windows application files (.exe,.dll,.ocx,.vb).
